### - Intelligence Seminar (3. Intuition and reasoning) -

1. What inspiration or question did you get through this class?

- I am interested in the girl which found several solutions of dot problem.
- I clearly understood that we are making a judgment with intuition or reasoning.
- It is interesting that there are intuition and reasoning to make a judgment.
- I should make a judgment deliberately, not intuitively, in understanding.
- It is important to defy the boundary.
- I understood that I was into the range of thought.
- I want to make the best use of what I learned today in the course “Entrepreneurship A.”

2. Please write daily experience which is related to the class of Intelligence seminar until now, and in referring to those, what idea or question did occur?

- <None>
- <None>
- Experience in this class is precious to be aware of the error of my judgment and thought.
- I considered a feeling of consumer when we produced sweets in the course “Entrepreneurship A.”
- I often fail to catch why I thought so although it likely to be able to be caught.
- Human impression is strongly related to what I learned in today’s class.
- <None>
