

Result of survey - Intelligence Seminar (1. Logic) -

1. How do you want to change yourself, and why?

- I usually tend to think indecisively before action and to feel despair or easy to compare someone else. It should be changed because hard days would come in working member of society.
- There are narrow view and poor English skill. As there is difficulty to understand things within my narrow view, I want to enroll in university and extend my view through the experience. Great English skill probably encourages it.
- I am not good at use language and cannot have motivation to dull matters at all.
- I am interested in many, so they cannot be given priority in order. It have to change because deliberate execution requires it.
- Low scholarship, because the university in which I want to enroll requires.
- Losing interested. I tend to give up, as opposed to doing to completion.

2. What inspiration or question did you get through this class?

- Until now I tended to lose an objective and mission in the entrepreneurship class and cannot summarize my thought in concluding in my life. From now on, I should verify and judge things to describe and visualize.
- I noticed my obstinacy and indecision.
- I knew that all of decision has process and reason.
- The proof which has simple calculation is also difficult. I understood that practice also needs mathematics.
- I understood that mathematics is necessary.
- How we can improve the accuracy of judgment.
